Jumper Cables and Wall Plates

Ensure seamless connectivity and a clean installation with our high-quality jumper cables and wall plates—essential accessories for any healthcare-grade TV system. Designed for durability and ease of use, these components help reduce signal interference and support organized cable management behind patient room TVs, nurse stations, and wall-mounted displays.

DIGITAL SIGNAGE

DIGITAL SIGNAGE

Powerful Displays, Lasting Impressions

FACILITY-WIDE DIGITAL SIGNAGE SOLUTIONS

Explore our range of cutting-edge digital signage solutions designed to enhance communication and operational efficiency across healthcare environments.

STANDARD DIGITAL SIGNAGE

UHD and FHD digital signage enhances hospital communication by providing clear, vibrant displays that serve a wide range of facility needs. Welcome guests with personalized messages at entry points, display accurate, real-time information at nurses stations, and use signage throughout your facility to honor donors, inspire patients, and elevate your organization's brand story. Strategically deployed, digital signage supports clinician efficiency by streamlining workflows, enabling instant updates, and promoting faster decision-making.

From high-traffic lobbies to staff-only zones, digital signage delivers timely, relevant content that informs, connects, and comforts. Designed for 24/7 operation with minimal maintenance, these displays integrate seamlessly with content management systems and support interactive features—creating a dynamic, reliable communication tool for every corner of your healthcare environment.

KEY FEATURES:
- High resolution (3840 x 2160 for UHD) for sharp, detailed visuals
- Vibrant color reproduction with a wide color gamut
- High brightness levels for visibility in various lighting conditions
- Wide viewing angles with consistent image quality
- Flexibility to display videos, images, text, and real-time data
- Seamless integration with digital signage platforms and content management systems
- Multiple connectivity options (HDMI, DisplayPort, USB)
- Designed for 24/7 operation with minimal maintenance
- Energy-efficient for cost savings
- Built-in content scheduling options
- Remote management for easy updates and monitoring

DIGITAL SIGNAGE

VIDEO WALLS

Our DVLED All-in-One and LCD video wall solutions deliver high-impact visuals—ideal for hospital lobbies, waiting areas, and conference rooms. These versatile displays are also perfect for digital donor walls, advertising, and showcasing digital artwork, enhancing both the patient and visitor experience. The all-in-one DVLED displays provide seamless, high-definition visuals, ensuring clear and engaging messaging across a wide range of applications—from informational content to dynamic advertising.

KEY FEATURES:

- High-resolution displays for crystal-clear, detailed visuals
- Ultra-thin bezels for seamless, edge-to-edge viewing
- Exceptional brightness levels for visibility in high ambient light
- Wide viewing angles for consistent image quality across perspectives
- Advanced color reproduction with deep contrast for vibrant images
- Scalable design to create customized displays for any space
- Integration with video wall processors for dynamic, synchronized content
- Flexible mounting options for custom configurations
- Robust build for 24/7 operation in demanding environments
- Easy remote control and monitoring capabilities
- Support for multiple content sources (HDMI, DisplayPort, USB, etc.)
- Energy-efficient design to reduce operating costs

CONTENT MANAGEMENT

One Solution. Endless Possibilities.

Autora DSM transforms digital signage in healthcare, providing seamless, centralized management for hospitals, clinics, and healthcare facilities. Designed to work across multiple operating systems and media players, Autora DSM integrates with industry-leading platforms to simplify communication, streamline workflows, and enhance patient engagement.

SEAMLESS COMPATIBILITY & INTEGRATION

Autora DSM offers exceptional flexibility, supporting a wide range of platforms, including Android TV, webOS, Linux, SMART Signage, and Windows IoT, ensuring seamless integration across diverse healthcare environments. It is fully compatible with leading media players, enabling healthcare facilities to maximize their existing infrastructure without the constraints of additional hardware.

OPTIMIZED FOR HEALTHCARE OPERATIONS

Healthcare organizations can utilize Autora DSM to power digital communication boards, interactive directories, wayfinding solutions, patient education displays, staff training screens, and emergency alert systems—all managed from a single intuitive dashboard. Whether used in hospital lobbies, waiting rooms, patient care areas, or administrative offices, Autora DSM ensures clear, dynamic messaging that keeps everyone informed and engaged.

CONTENT MANAGEMENT

EFFORTLESS CONTENT MANAGEMENT

With Autora DSM's advanced content management tools, healthcare facilities can easily schedule and update displays in real time. Features include a Playlist Manager, Scheduler, Data Manager, Events & Directories, Display Grouping, Screen Editor, and Widget Store, allowing administrators to manage content efficiently across multiple locations.

WHY CHOOSE AUTORA DSM FOR HEALTHCARE?

- **Remote Management** – Update and control screens from anywhere, anytime.
- **User-Friendly Interface** – No IT expertise required, easy to navigate.
- **Affordable Subscription Plans** – Cost-effective with volume discounts available
- **Reliable Performance** – Trusted by hospitals, clinics, and healthcare organizations.

Autora DSM offers a powerful, all-in-one solution for managing digital signage in healthcare settings. Enhance communication, optimize operations, and improve patient experiences with seamless, real-time content management.

CONTENT MANAGEMENT

LG Pro:Centric® Hospital Management Solution

### SMARTER TV SOLUTIONS FOR ENGAGEMENT AND EFFICIENCY

MDM integrates LG's Pro:Centric® platform to transform in-room televisions into interactive patient engagement hubs. This system allows healthcare providers to deliver branded content, facility information, and on-demand entertainment—all from a single, centralized platform.

PRO:CENTRIC FEATURES:
- Custom-branded TV interfaces
- Interactive menus for patient education, services, and more
- Real-time content updates via central management
- Compatible with both RF and IPTV infrastructure
- Seamless integration with pillow speakers and nurse call systems

CONTENT DESIGN SERVICES

Your organization has invested time and money into growing your brand and your MDM's Creative Content Creation solution should be no different. This is designed to not only carry your brand inside the walls of your business, but outside as well. Our Content Creation service is configured and designed to improve your customers' experience, while not adding more work for your staff and marketing teams. MDM's experienced team offers yours the ability to customize the look and feel of your customer interfaces and adds a variety of features that engage, inform, and improve your customer outcomes.

KEY FEATURES:
- 27" 4K (3840×2160) display with Mini-LED technology
- HDR10 and HDR Effect for enhanced visuals
- sRGB 139% (Area) color coverage
- Mirror and Rotation modes for flexible viewing
- Protection Glass (1.3t, anti-reflection, anti-fingerprint)
- 4PBP, PIP, and 3G-SDI support

4K UHD IPS Surgical Monitor | 31.5"

KEY FEATURES:
- Optimized picture quality for surgical procedures
- Multi-input connectivity
- HDR10 support
- 12G-SDI for seamless 4K video transmission

IPS 4K Surgical Monitor | 55"

KEY FEATURES:
- 55" IPS 4K display (3840 x 2160)
- 178° wide viewing angle
- 12G-SDI support for high-quality 4K video
- HDR10 and DCI-P3 86% color accuracy
- Mirror and Rotation modes
- IK06 impact-resistant design
- Failover Input Switch
- Picture-by-Picture (2/3/4PBP) and Picture-in-Picture (PIP)
- IP45/IP32-rated moisture and dust resistance

PROFESSIONAL SERVICES

Expertly Designed. Seamlessly Delivered.

At MDM Commercial, we do more than provide technology—we build solutions with you. As your complete technology partner, we offer strategic consultation, expert system design, and turnkey implementation services to ensure your healthcare facility is equipped with reliable, future-ready systems.

Whether launching a new build or modernizing legacy infrastructure, our proven process streamlines every phase—from initial planning to installation and support. With over 30 years of experience and deep expertise in healthcare environments, MDM delivers unmatched service and results.

PROFESSIONAL SERVICES OFFERINGS
- Consultation, System Design & Implementation
- IPTV & AVoIP Solutions
- TV Headend & RF Distribution
- LG Pro:Centric® Integrations

CONSULTATION, SYSTEM DESIGN & IMPLEMENTATION

Our consultative approach begins by understanding your goals and evaluating your existing infrastructure. From CAD drawings and renderings to IPTV architecture and DSP programming, we collaborate with your team to create scalable, high-performance solutions tailored to your facility.

WORRY-FREE IMPLEMENTATION & SUPPORT

MDM's centrally located warehouses, expert logistics coordination, and in-house technical team ensure seamless rollout and delivery. From staging and testing to on-site installation and user training, we manage every detail. And once your system is live, our team continues to support you with updates, troubleshooting, and long-term service.

WHY MDM COMMERCIAL?
- North America's largest commercial-grade digital display dealer
- Turnkey project management with national reach
- Experienced engineers, designers, and installers
- Competitive pricing and efficient logistics

Let's build smarter together. Contact us to schedule a consultation.

TV HEADEND & RF DISTRIBUTION

Reliable Broadcasting. Crystal-Clear Results.

Your distribution system is only as strong as its signal. MDM designs and deploys robust headend and RF systems that deliver high-quality, consistent content to every room—whether you're outfitting 10 beds or 1,000.

HEADEND SERVICES INCLUDE:
- Custom-designed RF headend systems
- Support for analog, digital, and hybrid formats
- Integration with satellite, cable, or IPTV sources
- Tailored channel lineups and branded messaging

RF DISTRIBUTION

A reliable, bandwidth-independent solution for transmitting off-air and satellite channels.

KEY BENEFITS:
- Low infrastructure costs
- Seamless integration with existing coaxial cabling
- Scalable design for future expansion
- Compatible with a broad range of commercial displays

Z-BAND SYSTEMS

Z-Band offers a smarter approach to RF video distribution with plug-and-play simplicity, compact equipment, and integrated fiber receiver options.

DIRECTV® HEADEND SOLUTIONS

MDM provides fully assembled, pre-tested HD headend systems with flexible programming packages designed to enhance the patient experience.

24

IPTV & AVOIP SOLUTIONS

Smart, Scalable Content Delivery Over IP Networks

MDM modernizes how content is distributed within healthcare facilities through IPTV (Internet Protocol Television) and AVoIP (Audio Video over IP) systems. These solutions use your existing Ethernet infrastructure to deliver high-definition video and audio to Smart TVs, digital signage, and mobile devices.

IPTV BENEFITS:

- HD video over CAT6 Ethernet
- Interactive, branded content
- Compatible with Smart TVs, tablets, and mobile devices
- Centralized TV system management

AVOIP BENEFITS:

- Ultra-low latency 4K video and audio over IP
- Software-defined control and routing
- Scalable across any facility layout
- Seamless integration with IPTV and AV systems

MDM provides complete design, installation, and post-launch support for all IP-based content delivery systems.

RAPID EXCHANGE PROGRAM

Our dedicated warehouses allow for fast delivery, and our Rapid Exchange Program guarantees that displays arrive in pristine condition. In the event of damage upon arrival, a replacement unit is promptly shipped, ensuring minimal disruption to your operations.

MDM COMMERCIAL RAPID EXCHANGE PROGRAM

If a TV arrives damaged, our hassle-free Rapid Exchange Program ensures a quick replacement. Simply submit a claim within 120 days of delivery by providing photos of the damaged unit, original box, and serial number. If a TV experiences technical issues within 30 days, a no-cost exchange is available following a brief troubleshooting process.

EASY 4-STEP PROCESS:

1. Visit mdmcommercial.com/damaged-tv-resolution-claim
2. Take and upload clear photos of the damage, TV serial number, & box.
3. Provide requested order details.
4. Receive a prompt response from our customer service team.

Note: Only LG commercial and healthcare televisions are covered under this program. Digital signage products are excluded.

CUSTOMER SUPPORT & ORDERING OPTIONS

MDM Commercial offers **dedicated customer support** for all purchased products and services. Whether you need troubleshooting assistance, order tracking, or technical support, our expert team is ready to assist.

HOW TO CONTACT US:

- **Phone:** Call us toll-free at 1-800-359-6741 (or 904-241-2340 outside the U.S.)
- **Website:** Visit mdmcommercial.com for live chat, product inquiries, and order tracking
- **Claims & Support:** Submit issues via mdmcommercial.com/customer-support-form
- **Fax:** Send requests to 1-866-504-2867 for returns and service inquiries.
- **Email:** Reach out for shipment tracking and general support.
